EDUCATION

✓ 2021

HIMIT Kafr El Sheikh

First Year Degree - Good

PROJECTS

✓ **An online Portfolio**

Welcome to my online portfolio, showcasing my skills as a front-end developer.

Explore my projects to see my expertise in HTML, CSS, Javascript, Sass and frameworks like Bootstrap 5 and React and I prioritize clean code, intuitive interfaces, and seamless user experiences.

- There's a new portfolio design I'm about to begin Creating it because the old one is not good as a design at all.

✓ **Online Bakery Website**

This was my first website I have ever created by myself. It was A training website to enhance my front end skills. I Created it with Vanilla Javascript. I didn't use any frameworks. But I only Used Sass To improve My css code.

- This website is a landing page with a local host, I will start changing it to multiple page soon after finishing the Portfolio and make it looks much better than just being a landing page.

✓ **Graphberry Templates**

I am using Graphberry templates to train myself and enhance my Front-End skills like " Html - Css - Js - Sass - Bootstrap5" . I have created almost 4 or 5 templates from it. I will keep Creating these templates to improve my skills.
